YB - Project Description

Project Overview

Project Background

This project is to further extend the web-based e-Portfolio system - **Microhard** developed by students from COMP30022.

Since the project has no other clients, therefore all of our team members and supervisor will be the clients to experience the product we develop.

Project Aims

- Optimize existing functions so that users can have a better experience while using them.account 20% of our time
- Expand new functions to achieve user's needs further in different scenarios.account 80% of our time

Project Tools

- **Agile model** will be the ideal tool for us to organise our work during this period
- When it comes to our daily communication, **SlackWechat** and **Zoom** will be the useful and convenient tools
- When it comes to the documents, we push our code in the **Github**, record the documents in the **Confluence** and track our workload by the **Trello**.

Project Period# we explain clearer in our timeline document click Timelines

The whole project will be divided to 2 Sprints.

We start our Sprint 1 at week 43.29and we plan to finish Sprint 1 at week 54.9

We start our Sprint 2 at week 64.12and we plan to finish Sprint 2 at week 84.30

Project Brief Planning# we explain clearer in our user stories document click User Story

	To-do-list	
Sprint 1	• **Information flow**	• User can browse the twits from friends or someone else
		• User can post the twits
		• User can search the twits
